Go-To-Market Execution Plan

MONTHS 1–2 (LAUNCH)

Founder-led demos and direct outreach to identified "50% ready-to-buy" beta pool.

MONTH 3

Onboarding first 3–5 paid pilot customers. Refining automated onboarding flow.

MONTHS 4–6

Signing first MSP partnership agreements. Listing on AWS/GCP Cloud Marketplaces.

MONTHS 7–9

SOC 2 Launch drives expansion into mid-market SaaS segment.

YEAR 1 END

$8M SOM target tracked. Profitability confirmed. Preparation for European entry.

Risk Analysis & Mitigation

Technical Risk	**Framework Logic Errors** Mitigation: Rigorous beta testing + third-party compliance advisor review before general release.
Market Risk	**Competition (Vanta/Drata)** Mitigation: Leverage "Proactive Remediation" and "Auto-Patching" as key differentiators vs. reactive tools.
Financial Risk	**Funding Gap** Mitigation: SAFE note structure for speed; maintaining lean team focused on revenue-generating features.

Adoption Risk	**Long Sales Cycles** Mitigation: Founder-led demos to build trust; pilot programs to show immediate value (days vs. months).
