START DATE

mm/dd/yyyy

TARGET COMPLETION DATE

mm/dd/yyyy

1 Initiation & Notification

0/8

ⓘ **Notice Period Requirement:** Most Master Service Agreements (MSAs) require a 30-day written notice for termination without cause. Check specific contract terms before proceeding.

- [ ] Send formal offboarding notice to vendor (per contract terms)
- [ ] Schedule vendor offboarding kickoff/exit meeting
- [ ] Notify internal stakeholders (IT, Legal, Finance, Operations, Security)
- [ ] Create offboarding project ticket / tracking record in ITSM
- [ ] Identify replacement vendor or interim operational solution
- [ ] Freeze new purchase orders and invoice processing
- [ ] Notify vendor of data handling and return obligations
- [ ] Document vendor performance summary for future reference

VENDOR NOTIFICATION DATE

2 Data Inventory & Classification

0/10

Data Sovereignty: Identify if data resides in specific jurisdictions (e.g., EU for GDPR, CA for CCPA) as this dictates deletion verification standards.

- [ ] Identify all data types shared with vendor (PII, PHI, financial, IP)
- [ ] Catalog all vendor-held systems, databases, and environments
- [ ] Classify data sensitivity: Public / Internal / Confidential / Restricted
- [ ] Confirm data locations: cloud buckets, on-prem servers, hybrid
- [ ] Identify all active integrations and data pipelines (API/SFTP)
- [ ] Document AI/ML models trained or fine-tuned on company data
- [ ] Identify any vendor sub-processors holding company data
- [ ] Review Data Processing Agreement (DPA) for specific deletion terms
- [ ] Confirm retention obligations per jurisdiction (GDPR, HIPAA, FedRAMP)
- [ ] Document physical media (drives, backups) held by vendor

DPA REFERENCE NUMBER

e.g., DPA-2023-084

JURISDICTIONS APPLICABLE

e.g., EU (GDPR), California (CCPA)

DATA CLASSIFICATION SUMMARY

Summary of sensitive data types involved...

3 Access Revocation

0/13

🔒 **Security Critical:** Immediate revocation of access prevents "zombie accounts" which are a primary vector for supply chain attacks. Verify IAM logs post-revocation.

- [ ] Revoke all SSO/OAuth vendor access tokens in Identity Provider
- [ ] Deactivate vendor user accounts in Okta / Entra ID / OneLogin
- [ ] Remove vendor from all Active Directory / LDAP security groups
- [ ] Revoke API keys, service accounts, and OAuth app credentials
- [ ] Remove vendor IPs from VPN / firewall allow-lists
- [ ] Revoke cloud console access (AWS IAM, Azure RBAC, GCP)
- [ ] Disable vendor access to project tools (Jira, GitHub, Asana)
- [ ] Remove vendor guests from Slack / Teams / Discord
- [ ] Revoke physical access badges and key cards
- [ ] Disable any shared vendor admin/privileged accounts
- [ ] Remove vendor from monitoring tools (Datadog, Splunk)
- [ ] Revoke client certificates / VPN configs
- [ ] Confirm access termination audit log extracted for compliance

4 Data Deletion & Return

0/12

Right to Erasure: Ensure compliance with GDPR Art. 17 and CCPA §1798.105. "Deletion" implies irreversible destruction, not just archiving. Get a signed certificate.

- [ ] Request formal "Proof of Deletion" certificate from vendor
- [ ] Confirm deletion of PII per GDPR / CCPA requirements
- [ ] Confirm deletion of PHI per HIPAA Safe Harbor standards
- [ ] Verify deletion from primary databases (production/staging)
- [ ] Verify deletion from backup and archive systems (or schedule)
- [ ] Verify deletion from AI/ML training datasets / feature stores
- [ ] Verify deletion from vendor sub-processors (cascading deletion)
- [ ] Recover/return all proprietary data, IP, source code, and assets
- [ ] Confirm destruction of API keys, tokens, and secrets
- [ ] Collect signed data deletion attestation from Vendor DPO
- [ ] Securely wipe any physical media/hardware (NIST 800-88)
- [ ] Archive deletion evidence for 7-year retention period

5 Contract & Legal Termination

0/12

⚖️ **Survival Clauses:** Ensure confidentiality (NDA), indemnification, and limitation of liability clauses survive the termination of the agreement.

- [ ] Review MSA termination clauses and notice periods
- [ ] Issue formal contract termination letter (signed by Legal)
- [ ] Confirm no "auto-renewal" clauses will inadvertently trigger
- [ ] Cancel all active purchase orders (POs) and SOWs
- [ ] Resolve outstanding invoices and payment disputes
- [ ] Collect final invoice and close AP payment cycle
- [ ] Confirm software license / subscription deactivation
- [ ] Return all company hardware or leased assets
- [ ] Reiterate non-disclosure / non-compete obligations post-term
- [ ] Document any pending legal disputes or warranty claims
- [ ] Obtain final lien waivers / UCC releases (if applicable)
- [ ] Close vendor portal access and billing accounts

6 Operational Continuity

0/10

Business Continuity: Ensure no "knowledge silos" are lost. Update internal runbooks and SOPs immediately to reflect the new vendor or internal process.

- [ ] Migrate all critical workflows to replacement vendor/internal team
- [ ] Update Approved Vendor Registry / CMDB status to "Inactive"
- [ ] Archive all vendor communications (emails, Slack, tickets)
- [ ] Transfer/close dedicated vendor email aliases or service accounts
- [ ] Update internal runbooks / SOPs referencing this vendor
- [ ] Notify downstream customers/partners of vendor change
- [ ] Update Third-Party Risk Register (remove active risk)
- [ ] Complete final cost reconciliation analysis
- [ ] Update insurance certificates (if vendor-specific policies exist)
- [ ] Archive all contracts, SOWs, DPAs, NDAs (7-year retention)

CONTINUITY NOTES

7 Post-Offboarding Audit

0/8

🕵️ **Verification:** Trust but verify. A post-offboarding scan often reveals 5-10% of access points were missed during initial revocation.

- [ ] Conduct 30-day post-offboarding security scan / audit
- [ ] Verify no residual vendor access remains (IAM/Firewall audit)
- [ ] Confirm no unauthorized data egress occurred post-notice
- [ ] Review SIEM/logs for any anomalous vendor activity
- [ ] Conduct lessons-learned debrief with stakeholders
- [ ] Update vendor risk assessment framework with outcome
- [ ] Record offboarding duration and compliance rate KPIs
- [ ] Share audit findings with CISO / DPO
